

## Bishops - Become who you are! "Provide"

---

The Bishop provided the guidance and counsel the King needed in the day's chess was created. We must gain information, understanding, and wisdom to pour into others. All three are important. Information is only information if you don't comprehend it or apply it. When we become who we are, we are connected to who created us. Once you know your purpose, life becomes clear. When you know your gift, you are always able to provide for yourself, and for others. Leadership is the same, before you lead others, you must first be leading yourself.
